Quality report

CÁICU combines modernity with finishes that evoke nature and it wants to bring the tranquility of the location to the design of the units by combining large luminous spaces with a European design.

FACADE

The facade was designed to combine glass and high quality aluminum with planters that have controlled irrigation that optimize water usage. The design is combined with light enclosure elements with thermal and acoustic insulation.

ROOF

The roof will be flat and have a waterproof layer to be decided on in situ by the technical management. The technical areas for the exterior climate control units will be located there.

INTERIOR WALLS

The interior walls will be built with a light structure and there will be acoustic insulation between spaces.

TILING

The flooring will be top quality imitation wood ceramic tiling or imitation wood laminated flooring, to be decided by the D.F. in all rooms in the residence with white baseboards in the living room, hallways and bedrooms.

The terraces will have top quality non-slip ceramic flooring.

The basements will have milled concrete quartz finished flooring.

FINISHES

The flooring will be top quality imported ceramic with combined 90 x 90 cm, 60 x 60 cm and 40 x 40 cm pieces. And it will be finished with a 10 cm baseboard.

The terraces will have top quality non-slip ceramic flooring that goes with the interior.

The common areas and lobbies will be finished with non-slip materials.

The underground parking lot will be made with milled concrete with a quartz or painted finish depending on the decision of the technical management.

The walls and ceilings of the residences will have top quality smooth paint to be chosen from the ranges offered for the residence as a whole.

The kitchen and bathrooms will have top quality ceramic according to the palette offered.

INDOOR CARPENTRY

The doors of the residences will have security locks. 2.2 m Smooth monoblock doors and jambs will be used for the interior.

PLUMBING

The kitchen will have connections and drains for a kitchen sink, washing machine and dishwasher.

There will be European style faucets and suspended toilets with a hidden tank.

The shower floor will be built in place with the same material and it will be flush with the floor.

CLIMATE CONTROL AND HOT WATER

There will be individual climate control systems and heating can be used on-line.

Depending on the residency, there will be thermostats for climate control by areas.

There will be running water on the terraces.

ELECTRICITY, TV AND TELEPHONES

There will be Niessen or similar home mechanisms.

All areas of the unit, bedrooms, living room and terrace, will have TV and telephone jacks and electrical outlets.

The units will have LED lighting.

The terraces will have LED system perimeter lighting.

KITCHEN, BATHROOM AND STANDARD EQUIPMENT

A modular kitchen with a complete line of appliances is included in the delivery.

A furniture package is included in the sales price.

Bathroom furniture design exclusively for the housing development are included in the price.

OTHER

There will be separate trash collection outside the property with dumpsters for organic waste, paper and plastics.

It is a private housing development with green areas and recreation areas.

At least a parking space in the basement of the building and a locker for each owner are included in the deed for every unit.
